The message format When observing the data flow, it was clear that the device sends out a byte-string of 11 bytes roughly every second: B0B0B0B0B03131B0B50D8A B0B0B0B0B03131B0B50D8A B0B0B031BD8A B0B0B3310D8A B0B2B3310D8A.. Opens the specified serial port, asserts the control lines as required (RTS logical 0, positive voltage; DTS logical 1, negative voltage) and outputs the data to stdout.. Besides showing no data, the tester also indicated that the control lines were asserted differently.. By asserting the control lines the same way under MacOSX, the problem was resolved.. Hanya menyisakan para prajuritnya I got another toy to play with: A digital multimeter with RS232 interface and True RMS power measurement.

The following table shows what I discovered for the other bits in the message. The nibbles (4 bit group) are numbered from left to right starting from 0. Quetzalcoatl says: You might find this one interesting: the function codes match exactly to those you've posted above.. VOLTcraft DMM VC940 SCH VOLTcraft DMM VC 635 655 675 SCH. Namun kemudian teruskan lagi saat prajurit Orochi mulai membuat onar.. This significantly reduces the complexity of a protocol. This optical part showed to be the first problem.. When I insert my RS-232 tester when running the Windows application, I could see data passing; under MacOSX no data would pass.. The baudrate and other settings were found by simply trying different values. When receiving at 2400bps, 8 databits, no parity and 1 stopbit (2400 8N1 for short), measurements were recorded in the Windows application.. The VC-940 uses a photodiode. Since the cable connecting the multimeter to the computer only contains an optical receiver, it is impossible for the computer to communicate with the meter.. Sadly, it comes with Windows-only software, which I interpreted as a challenge! Since this is electrical measuring equipment, the serial communication should be electrically insulated from the device.. Apparently, the voltages on the control lines are used to power the optical receiver electronics. 6e4e936fe3 [Fwb Hard Disk Toolkit Updater \(free Version Download For Mac\)](#)
